

Where we are going

100's of organizations will be partnering with Nature's Nurse to distribute Fijian Red Mangrove and other future offerings where it benefits the health of their members, the economy of the Fijians, and the peace and well being of the Children around the globe, while simultaneously raising funds for their own initiatives of goodness.

Nature's Nurse, Inc. is becoming a model for other businesses to emulate — a profitable and self-sustaining cycle-of-life, both of giving and receiving. It is a holistic integration of heart centered foundation, authentic leadership, integration of indigenous wisdom, profitable business practices, creative marketing and distribution integrating with humanitarian efforts, and caring for the environment.

Our research continues to truly unleash all of the potential within the Fijian Red Mangrove. It's also locating other unique and powerful solutions to help people's health. We continue learning and becoming larger centers-of-influence and participants in the development of profitable-business-with-purpose concepts and in the involvement with world leaders to resolving disparity issues and to bringing peace, hope, prosperity, and health to all those we are touching.
