

Testimonies of Nature's Nurse Users

"It has been a long winter here in Europe and now finally spring seems to come! This mail comes to tell you how thankful we are to your "nature's nurse" - drops! 3 to 4 times we have been attacked by bad colds/bronchitis in these last 3 months, also due to our extensive travelling-life and every time your magic drops have helped us to get rid of it in 2 - 3 days !! As promised on the instruction! We are delighted and thank you for introducing them to us!"
Prince Michael and Princess Christiana von Habsburg, Monaco

"Dr. Anders, I have just finished taking the Nature's Nurse® myself for a nasty “plane” cold that I contracted on my return flight home. It seems to be every bit as good as you promise."
David, Glasgow, UK

"Thank you Nature's Nurse® for helping me to get rid of sinus infections which I use to pick up on airplanes because I commute so much between Europe and America. Since I've been using Nature's Nurse®, I have not suffered from one sinus infection, cold or allergy symptom. I intend to use Nature's Nurse® all the time especially before I fly and after because it has improved my health 100%."
Kristina Lynn, Monte Carlo, Monaco

"Wanda got a cold and I started giving her Nature's Nurse® right away (3 droppers a day) and her cold never went into her chest, and it only lasted 4 days. The cold was practically terminated before it had a chance to get started. She is 80 years old. It really does work."
Kate M., North Dakota

"My doctor, Dr. Carroll, gave me a vial of Nature's Nurse® when I complained to him of chronic sinus infections and colds and many days of missed work. He explained to me that it was safe to use and wouldn't interact or interfere with any of the medications that I was currently taking. I work with preschool aged special needs children, and I find myself in the path of many colds. I have taken Nature's Nurse® on two occasions. The first time I took it on the 2nd day of symptoms and by the 4th day I was feeling better (i wish I would have started it sooner that time). The 2nd time I took it at the first sign of cold symptoms (sore throat, fatigue) and within 3 days I was symptom free. This is a huge improvement for me. Normally, when I get colds I am sick for 2 weeks and end up needing an antibiotic for secondary sinus infections. When taking Nature's Nurse®, my symptoms resolved themselves faster, without a trip to the doctor, and without an antibiotic. I think that Nature's Nurse® is a wonderful product and I hope that it never goes out of production! I didnt even realize how much it was helping me until I ran out and found myself in the midst of another bad cold. I highly recommend this product to anyone with chronic sinus trouble or anyone that works with children."
Pam S., Atlanta, GA

"I have been so happy with Nature's Nurse®. It has been a true blessing for me because I have suffered for many years with emphysema and Asthma and I could not walk up a flight of stairs without having to stop, sit down and rest after just a few steps. But since I've been taking Nature's Nurse®, I have been able to climb the stairs alone without any help and without stopping to rest at all. This is something I have not been able to do for over eight years. Thank you Nature's Nurse®."
Carol G., Atlanta, GA

"As a teacher, it's common for me to get 3-4 colds per year. I'm constantly in the path of sneezing and coughing students who are all too willing to share their germs. That is until my friend shared a new discovery with me - Nature's Nurse®. I felt my 1st cold coming on in December. I took Nature's Nurse® as directed the first day, and surprisingly the next morning I was feeling healthy and snuffle-free. In the months following, whenever I've felt achy or congested, I've taken Nature's Nurse®. It's now April, and I haven't missed a single day due to illness all year. The investment is worth it because I now use my 'sick' days for much more enjoyable activities! Thanks Nature's Nurse®."

Krista B., Pouder Valley School District

"It's really nice to see how helpful the Nature's Nurse® is for my five year old nephew and that he likes the taste. It gave me reason to purchase some for my two daughters."
S. Frye, Golden, Colorado

"I even had husbands of my clients come to the spa to buy Nature's Nurse® because their medicine chest was out and they HAD to have it just in case."
Peggy Corsello - America Face and Body Spa, Atlanta, GA

"Of the 25-30 patients that have taken Nature's Nurse®, better than 8-of-10 are seeing dramatic responses to their cold and related symptoms. With a gentle educational introduction as "the product of the season for

remedy and prevention," 1/3 are taking a bottle home with them immediately, and a significant number of others a purchasing a bottle later. In addition to helping them, it's a nice add-on revenue source for my practice."

John B. Day, Washington, DC

"I took a bottle of Nature's Nurse® with me on my cruise to Northern Europe. Sure enough, on the plane trip I picked up a cold-virus. I felt awful, but remembered the Nature's Nurse®. I followed the instructions and in one day it was gone. Thanks for saving my cruise… we enjoyed it."

C. Hayward, CPA

"Although I rarely get colds, I recently began one and immediately started the Nature's Nurse® regimen as directed on the bottle. I had a sore scratchy throat, a "full" head, itching nose and ears… all symptoms of a really heavy cold or sinus infection on its way. The symptoms began to recede and never really developed. I firmly believe it to be the anti-viral effects of the tea!! What a relief!! Thanks for bringing this great remedy to the states."

Mary, Florida
